DELIVERABLE 4

SECURITY MEASURES SOP

Standard Operating Procedure

Physical Security • Workplace Safety • Security Incident Procedures

Document Number	SOP-SEC-004
Version	1.0
Effective Date	[Insert Date]
Department	Administration / Security / Human Resources
Approved By	[Authorized Management Representative]
Review Frequency	Annually or following a significant security incident

This SOP establishes standard procedures for protecting employees, visitors, company property, confidential information, and workplace facilities.

1. Purpose

The purpose of this Standard Operating Procedure (SOP) is to establish consistent security and workplace safety practices to:

- Protect employees, visitors, contractors, and other authorized personnel.
- Prevent unauthorized entry, theft, vandalism, workplace violence, and loss of company assets.
- Safeguard confidential documents, electronic equipment, and sensitive business information.
- Establish procedures for emergencies, security incidents, incident investigations, and corrective actions.
- Ensure office opening and closing activities are completed safely and consistently.

2. Scope

This SOP applies to all employees, management, security personnel, reception staff, contractors, temporary workers, and visitors entering or working within company premises. It covers office entrances and exits, meeting rooms, storage areas, records rooms, equipment rooms, and other designated workspaces. All personnel must comply with this SOP and applicable laws, regulations, and company policies.

3. Roles and Responsibilities

3.1 Management

- Approve and support implementation of security procedures.
- Provide appropriate security equipment, emergency resources, and staff training.
- Appoint responsible personnel for security oversight.
- Review serious incidents and approve corrective measures.

3.2 Security Personnel

- Monitor office entrances and exits; verify identification and maintain visitor records.
- Control access to restricted areas and report suspicious activity.
- Assist with evacuations and emergency response.

3.3 Reception / Administration

- Register visitors, notify employees of arrivals, and issue and collect visitor badges.
- Maintain visitor logs and report access-control failures or unusual activity.

3.4 Employees

- Display company identification where required and protect company property, access cards, keys, and confidential documents.
- Report security concerns, hazards, and incidents promptly.
- Follow evacuation instructions and emergency procedures.
- Challenge unfamiliar persons only when safe and in accordance with company procedures.

3.5 Security Coordinator / Designated Manager

- Maintain incident reports and security registers.
- Coordinate investigations and corrective actions.
- Review access permissions and security arrangements and ensure relevant training is provided.

4. Office Entry, Exit, Visitor Registration, and Access Control

4.1 Employee Entry and Exit

1. Employees must enter and leave through designated access points.
2. Employees must use assigned access cards, keys, or other approved credentials.
3. Access cards and credentials must not be shared, transferred, or lent to others.
4. Employees must not allow unauthorized persons to follow them through controlled doors (tailgating).
5. Lost or stolen access cards and keys must be reported immediately for deactivation or replacement.
6. Restricted areas may only be accessed by authorized personnel.
7. Doors, gates, and emergency exits must remain unobstructed. Emergency exits must never be locked or blocked in a way that prevents safe escape.

4.2 Visitor Identification and Registration

1. Greet the visitor and establish the purpose of the visit.
2. Verify identity using an appropriate method where necessary and proportionate to the security risk.
3. Record the visitor's name, organization (if applicable), host employee, purpose of visit, arrival time, and departure time.
4. Contact the relevant employee to confirm the visit.
5. Issue a temporary visitor badge where applicable.
6. Ensure visitors are accompanied in restricted or sensitive areas.
7. Collect the visitor badge and close the visitor record upon departure.

Visitor identification documents must not be copied or retained unless there is a lawful and documented business need.

4.3 Contractors and Service Providers

- Register contractors and maintenance personnel before they enter work areas.
- Verify identity, work authorization, and intended work area as appropriate.
- Limit access to the approved work location and duration.
- Authorize and control high-risk work, such as electrical repairs or work at height, under applicable safety procedures.
- Require compliance with confidentiality requirements and workplace safety rules.

4.4 Access Control and Restricted Areas

- Access permissions must be approved by an authorized manager.
- Apply additional restrictions to sensitive areas such as records storage, IT infrastructure, financial records, and confidential project rooms where appropriate.
- Update access permissions promptly when employees change roles or leave the organization.
- Set a clear purpose and expiry date for temporary access.
- Document and report unauthorized entry attempts.

5. Protection of Company Assets and Confidential Documents

5.1 Company Assets

Employees must protect company-owned or company-controlled assets, including laptops, mobile devices, office equipment, keys, access cards, files, and other valuable items.

1. Maintain an inventory of significant assets, including asset identification number, assigned user, and location.

2. Secure portable equipment when unattended and avoid leaving valuable items visible in unsecured areas.
3. Do not remove company property from the premises without appropriate authorization.
4. Report theft, loss, damage, or suspected tampering immediately.
5. Return equipment when employment ends or when requested by management.
6. Dispose of obsolete equipment through an authorized process that protects stored information.

5.2 Confidential Documents and Records

- Limit access to confidential documents to authorized personnel.
- Store paper records in locked cabinets or secure rooms when not in use.
- Do not leave sensitive documents unattended in meeting rooms, printers, reception areas, or common spaces.
- Verify recipients before sharing confidential documents.
- Dispose of confidential papers using approved shredding or secure-disposal procedures.
- Do not allow visitors to photograph, copy, or access confidential records without authorization.
- Follow applicable data protection, records retention, and confidentiality requirements.

5.3 Electronic Information and Devices

- Use approved passwords, access controls, and multi-factor authentication where available.
- Lock computer screens when leaving workstations unattended.
- Do not share passwords or access credentials.
- Report lost devices, suspicious emails, suspected account compromise, or unauthorized access to IT or Security.
- Store confidential electronic records only in approved systems.
- Revoke departing employees' system access under the organization's offboarding process.

6. CCTV and Monitoring Guidelines

CCTV and other monitoring measures may be used where justified by legitimate security, safety, or operational requirements and permitted by applicable law.

6.1 Installation and Use

1. Install cameras only in approved locations following a documented assessment of security needs.
2. Cameras may cover entrances, exits, reception areas, corridors, and other appropriate common or security-sensitive areas.
3. Do not install cameras in toilets, changing rooms, or other areas where individuals reasonably expect a high degree of privacy.
4. Do not enable audio recording unless separately assessed, authorized, and lawful.
5. Display appropriate signage where required to inform employees and visitors that CCTV is in operation.

6.2 Access to Footage

- Only designated, authorized personnel may access CCTV footage.
- Use footage only for legitimate security, safety, incident investigation, or other approved lawful purposes.
- Authorize and document viewing, exporting, sharing, or disclosure of footage.
- Do not share footage publicly or use it for personal purposes.
- Refer requests from law enforcement or other external parties to the designated manager for verification and lawful handling.

6.3 Storage and Retention

- Protect CCTV systems against unauthorized access, copying, alteration, and deletion.
- Retain footage only for the approved period, subject to applicable law and documented business requirements.
- Preserve relevant footage beyond normal retention when needed for an investigation, legal hold, or lawful request.
- Maintain access and disclosure records where appropriate.

7. Emergency Evacuation and Workplace Safety

7.1 General Emergency Rules

In any emergency, the protection of human life takes priority over company property.

- Remain calm and follow instructions from designated emergency personnel.
- Raise the alarm and contact emergency services when necessary.
- Avoid elevators during a fire or when evacuation instructions prohibit their use.
- Use designated escape routes and emergency exits and proceed to the assigned assembly point.
- Do not re-enter the building until authorized by appropriate emergency personnel.

7.2 Fire Safety

1. Keep fire exits, corridors, stairways, and firefighting equipment accessible at all times.
2. Do not overload electrical outlets or use damaged electrical equipment.
3. Report smoke, burning smells, exposed wiring, or other potential fire hazards immediately.
4. Know the locations of fire alarms, extinguishers, emergency exits, and evacuation routes.
5. Activate the fire alarm and evacuate if a fire is discovered.
6. Use a fire extinguisher only if trained, the fire is small and manageable, the correct equipment is available, and a safe escape route remains open.
7. Never delay evacuation to collect belongings or attempt to save company property.

7.3 Evacuation Procedure

1. Stop work and leave by the nearest safe designated exit.
2. Assist visitors and persons requiring assistance where safe to do so.
3. Do not return to the building to retrieve belongings.
4. Proceed to the designated assembly point.
5. Supervisors or designated wardens should account for employees and report missing persons to emergency responders.
6. Security personnel should support evacuation and provide information to emergency services without placing themselves at risk.
7. Re-entry is permitted only after authorization from the appropriate emergency authority or designated responsible person.

7.4 First Aid and Medical Emergencies

- Maintain accessible first-aid kits and inspect and replenish them periodically.
- Identify trained first-aid personnel and communicate their availability to employees.
- For serious injury or illness, contact emergency medical services immediately.
- Provide first aid only within the responder's training and competence.

- Do not move an injured person unless necessary to protect them from immediate danger, except as directed by qualified responders.
- Record workplace injuries and medical emergencies through the approved reporting process while respecting medical confidentiality.

7.5 Workplace Safety and Hazard Reporting

Employees must report unsafe conditions, including wet floors, blocked exits, damaged furniture, exposed wires, inadequate lighting, and other hazards. Administration or the designated safety representative must assess reported hazards, arrange corrective action, and restrict access to unsafe areas where necessary.

7.6 Emergency Contacts

Complete, display at suitable locations, and keep the following information up to date:

Contact	Details
Local emergency services	[Insert verified number]
Fire and rescue service	[Insert verified number]
Ambulance / medical emergency	[Insert verified number]
Building management	[Insert contact number]
Security supervisor	[Insert contact number]
Administration / HR	[Insert contact number]
Designated emergency coordinator	[Insert contact number]
Office assembly point	[Insert location]
Nearest hospital / medical facility	[Insert name and contact details]

8. Security Incident Reporting and Escalation

8.1 Reportable Incidents

- Unauthorized entry or attempted access.
- Theft, loss, or damage of company property.
- Lost keys, access cards, or confidential documents.
- Suspicious persons, packages, or activities.
- Threats, harassment, violence, or other unsafe conduct.
- Fire, medical emergencies, and workplace injuries.
- CCTV, alarm, lock, or access-control failures.
- Suspected disclosure of confidential information or unauthorized recording.
- Any event creating significant risk to people, assets, information, or business operations.

8.2 Immediate Response

1. Protect yourself and others from immediate danger.
2. Contact emergency services when there is an immediate threat to life, serious injury, fire, or suspected criminal activity requiring urgent assistance.
3. Notify Security, Administration, or the designated manager as soon as practicable.
4. Prevent further access or damage where safe and authorized.

5. Preserve relevant evidence, including photographs, access logs, documents, or CCTV footage, where lawful and appropriate.
6. Avoid confronting a suspected offender or disturbing evidence unnecessarily.
7. Record facts accurately and avoid speculation.

8.3 Incident Escalation

Level 1 — Minor: Routine access irregularities, minor property damage, or non-critical procedural failures. Report to Security or Administration for resolution.

Level 2 — Significant: Theft, repeated unauthorized access, lost sensitive documents, security system failure, or suspected information compromise. Notify the designated manager and relevant IT, HR, or other responsible function promptly.

Level 3 — Critical: Fire, serious injury, violence, credible threats, major data exposure, or an immediate threat to life or business continuity. Contact emergency services where necessary and immediately notify senior management and relevant responsible authorities.

These levels guide internal escalation and do not replace legal reporting obligations or emergency instructions.

8.4 Incident Report

A security incident report must be completed as soon as practicable and should include:

- Incident reference number; date, time, and location.
- Reporting person's name and contact details.
- Description of the incident and circumstances.
- Individuals involved and witnesses, where known.
- Property, records, or systems affected.
- Immediate actions taken; persons or authorities notified and notification times.
- Available supporting evidence and actual or potential impact.
- Investigation findings, corrective actions, responsible person, and closure date.

Personal information must be collected and handled in accordance with applicable privacy requirements.

9. Incident Investigation and Corrective Action

The designated manager or authorized investigator must coordinate the investigation.

1. Assign an incident reference number and record the initial report.
2. Assess severity and determine whether additional escalation is required.
3. Secure relevant evidence and restrict access to it.
4. Interview relevant personnel and witnesses fairly and confidentially.
5. Review access logs, CCTV footage, asset records, or other relevant information where authorized.
6. Determine the likely cause, extent of loss or harm, and any control failures.
7. Document findings and recommendations.
8. Assign corrective actions, responsible persons, and target completion dates.
9. Verify that corrective actions have been implemented.
10. Close the incident record after review and approval by the designated authority.

Investigations must be impartial, proportionate, and conducted in accordance with company policies and applicable law. Suspected criminal conduct must be referred to appropriate authorities when required or appropriate.

10. Office Opening Procedure

1. Arrive using authorized credentials and check the entrance area for signs of forced entry or suspicious activity.
2. Verify that doors, locks, windows, and access-control systems appear secure.
3. Check for visible hazards, smoke, water leaks, electrical issues, or unusual conditions.
4. Confirm that required alarms, lighting, and security systems are functioning according to the applicable procedure.
5. Check that emergency exits and evacuation routes are clear.
6. Report irregularities before allowing normal office operations to resume.
7. Unlock authorized work areas and prepare the office for staff and visitors.
8. Record opening time and unusual observations in the security log, where maintained.

If forced entry, a suspected break-in, or another serious security concern is discovered, do not enter or disturb the area if doing so could create danger or compromise evidence. Notify Security or management and contact emergency services or appropriate authorities when necessary.

11. Office Closing Procedure

1. Confirm that employees and visitors have departed or that authorized after-hours occupants are accounted for.
2. Check meeting rooms, common areas, storage rooms, and other authorized spaces for unattended persons or obvious hazards.
3. Secure confidential documents, keys, access cards, and portable company equipment.
4. Ensure that windows, authorized doors, and restricted areas are properly secured.
5. Switch off non-essential equipment and lighting in accordance with energy, operational, and safety requirements.
6. Confirm that fire exits remain unobstructed and required safety systems remain operational.
7. Activate the alarm or security system according to approved instructions.
8. Lock designated entrances and record the closing time.
9. Report unresolved hazards, security concerns, or system failures to the responsible manager.
10. Ensure approved after-hours access arrangements are documented.

Employees must not disable essential safety systems or leave the premises unsecured.

12. Key and Access Card Management

- Issue keys and access cards only to authorized individuals.
- Record issuance, return, replacement, and deactivation.
- Store master keys and high-level access credentials securely with restricted access.
- Report lost or stolen credentials immediately.
- Review access permissions periodically and adjust them when job responsibilities change.
- Return all keys, cards, and company access devices when employment ends or authorization is withdrawn.

13. Training and Awareness

Provide appropriate training and awareness to employees and relevant contractors on:

- Entry and visitor registration procedures.
- Protection of assets and confidential information.
- Incident identification and reporting.

- Fire safety, evacuation routes, and assembly points.
- Emergency contacts and first-aid arrangements.
- CCTV privacy requirements and authorized use of monitoring systems.

New employees should receive security orientation during onboarding. Refresher training and evacuation drills should be conducted periodically according to assessed risks and applicable requirements.

14. Records and Documentation

Maintain the following records, as applicable:

- Visitor registration logs.
- Key and access card registers.
- Asset inventory and asset transfer records.
- Security inspection and opening/closing logs.
- Incident reports and investigation records.
- CCTV access and disclosure logs, where appropriate.
- Emergency drill and training records.
- Corrective action and maintenance records.

Records must be stored securely, accessible only to authorized personnel, and retained or disposed of according to the approved retention schedule and applicable law.

15. Compliance and Disciplinary Action

Failure to follow this SOP may result in corrective action or disciplinary measures in accordance with company policies and applicable law. Any disciplinary response must be proportionate, based on established facts, and handled through the organization's approved process. Serious incidents may require referral to relevant external authorities.

16. Review and Approval

This SOP must be reviewed at least annually and whenever a significant incident, change in premises, new security risk, or relevant legal requirement warrants an update.

Approval Role	Name	Signature	Date
Prepared By	[Insert Name]	_____	_____
Reviewed By	[Insert Name]	_____	_____
Approved By	[Insert Name]	_____	_____

Implementation Note

Before issuing this SOP, management must complete the emergency contact directory, identify evacuation routes and assembly points, designate responsible personnel, confirm local legal requirements, and communicate the procedures to all relevant staff.
